

U.S. Customs and Border Protection

Trusted Traveler Programs

The Quickest Way to Cross!

If you're a frequent border crosser who's looking for a way to speed up your entry into the United States, consider joining a Customs and Border Protection Trusted Traveler program. A small fee, a background check and an interview are usually all that's required. Filling out the application takes just a few minutes.

Approved commercial truck drivers (FAST), air, sea and highway travelers entering from Canada (NEXUS), and highway and pedestrian travelers entering from Mexico (SENTRI) - all enjoy the benefit of automated border clearance through dedicated commuter lanes.

More than a quarter of a million people have enrolled as CBP Trusted Travelers. For more information about fees, enrollment center locations, or to download an application, visit www.cbp.gov or contact an enrollment center (see reverse) for more information about becoming a CBP trusted traveler.

NEXUS, SENTRI and FAST Trusted Traveler Cards will be accepted as proof of identity and citizenship and serve as a secure alternative to a passport for purposes of the Western Hemisphere Travel Initiative.

Apply to NEXUS and SENTRI online at <https://goes-app.cbp.dhs.gov>

Fees vary by program and program-specific restrictions apply. NEXUS and northern border FAST are jointly administered by CBP and the Canada Border Services Agency, which independently approve program participation based on a common application. Use of the FAST commercial truck lane requires participation in the Customs - Trade Partnership Against Terrorism (C-TPAT) by parties other than the driver.

Advisory Notice:

CBP trusted traveler credentials use radio frequency identification technology (RFID). Program participants should be aware that 1) all applicant data is stored in a secure CBP database; 2) no participant data is stored electronically on the program credential or transmitted with the RFID; 3) RFID technology permits CBP to make a record of the date and time an individual member/user crosses the border; and 4) used in combination with the biographic data previously provided to CBP by the individual member/user during the application process, RFID technology facilitates CBP queries of other law enforcement databases to verify the participant's continued program eligibility and status as a current member in good standing each time entering the United States.
